

Offer for preventive testing of employees

Purpose: preventive patient testing - SARS-CoV 2 (COVID-19)

Company will provide:

- Outside area for setting up a collection point (4x4) - a shelter to which Medirex parks a collection car, table and chair
- Fill in the form - create a list of employees provided by Medirex and on the basis of which the sampling kits (application form, sample material) will be generated before testing
- Ensure the management of the arrival and departure of employees at the collection point (time intervals, number of persons) according to the schedule in the form
- Ensure distribution of instructions to employees prior to collection
- Deliver the employee list form no later than 24 hours prior to collection to natalia.ciernikova@medirexgroup.sk

Medirex will provide:

- Collection and support staff for biological material collection, with pre-analytical and post-analytical conditions adhered to
- Protective equipment required to collect biological material
- Automated pre-collection requests
- Making a billing payment (60 EUR / completed test including collection)
- Collection of samples to Medirex central laboratory
- Sample analysis and distribution of results to the patient via SMS and e-mail in 48 hours
- In case of a positive result, transport of the sample to the state agency to ensure further processing of the infected patient
